

FIRST GRADE SUMMER MATH CAMP

In addition to a Summer Reading List, this year we are asking you to assist your child in completing some Math activities. The attached packet contains worksheets on Math concepts that your child learned in Kindergarten!

In order to give your child a GIANT head start at the beginning of next year, start working on the packet in August. This will mean less review time and more learning time in September! Return the completed packet the first day of school!

HAPPY SUMMER!

Mrs. Chamberlain

P.S. Some of the math work may ask your child to use manipulatives such as linking cubes or counters. Please don't worry about not having these manipulatives! The work can be completed by simply drawing, tracing or coloring! Thanks
